

HM Coastguard

# Lifejackets are lifesavers. Make sure you wear yours.

Accidents and falls can happen at any time on floating pontoons and harbours. A lifejacket or personal floatation device (PFD) could make all the difference in keeping you afloat if you fall in the water.

- Always wear your lifejacket or PFD
- Take extra caution when moving off and onto your boat
- Ensure everyone in your group stays safe

In an emergency, contact the Coastguard on VHF Channel 16 or by calling 999.
